

# Race to the Audiologist Game

## Rules:

1. Roll a dice and move the number of spaces that you rolled. If you do not have a dice, you can print the one below and use that!
2. Follow the directions written on the space that you land on.
3. If you land on a space that says, "Pick a Card", pick a card and answer the question.
4. If you have the right answer, you get another turn and can roll again! But... if you are wrong or you don't know, you must move back two spaces!
5. You must roll the exact number in order to move to the finish space.

Have FUN!!

What does an X mean on the audiogram?

What does an O mean on the audiogram?
